

# PIDI TECHNOSOLUTIONS

APMECH GROUP

*Engineering to Excellence*

## A. Wedge Grips

Self Tightening by 2 pin method and spring method with excellent Pre load and no slip. EN 32 Jaws and C45 Body

Capacity

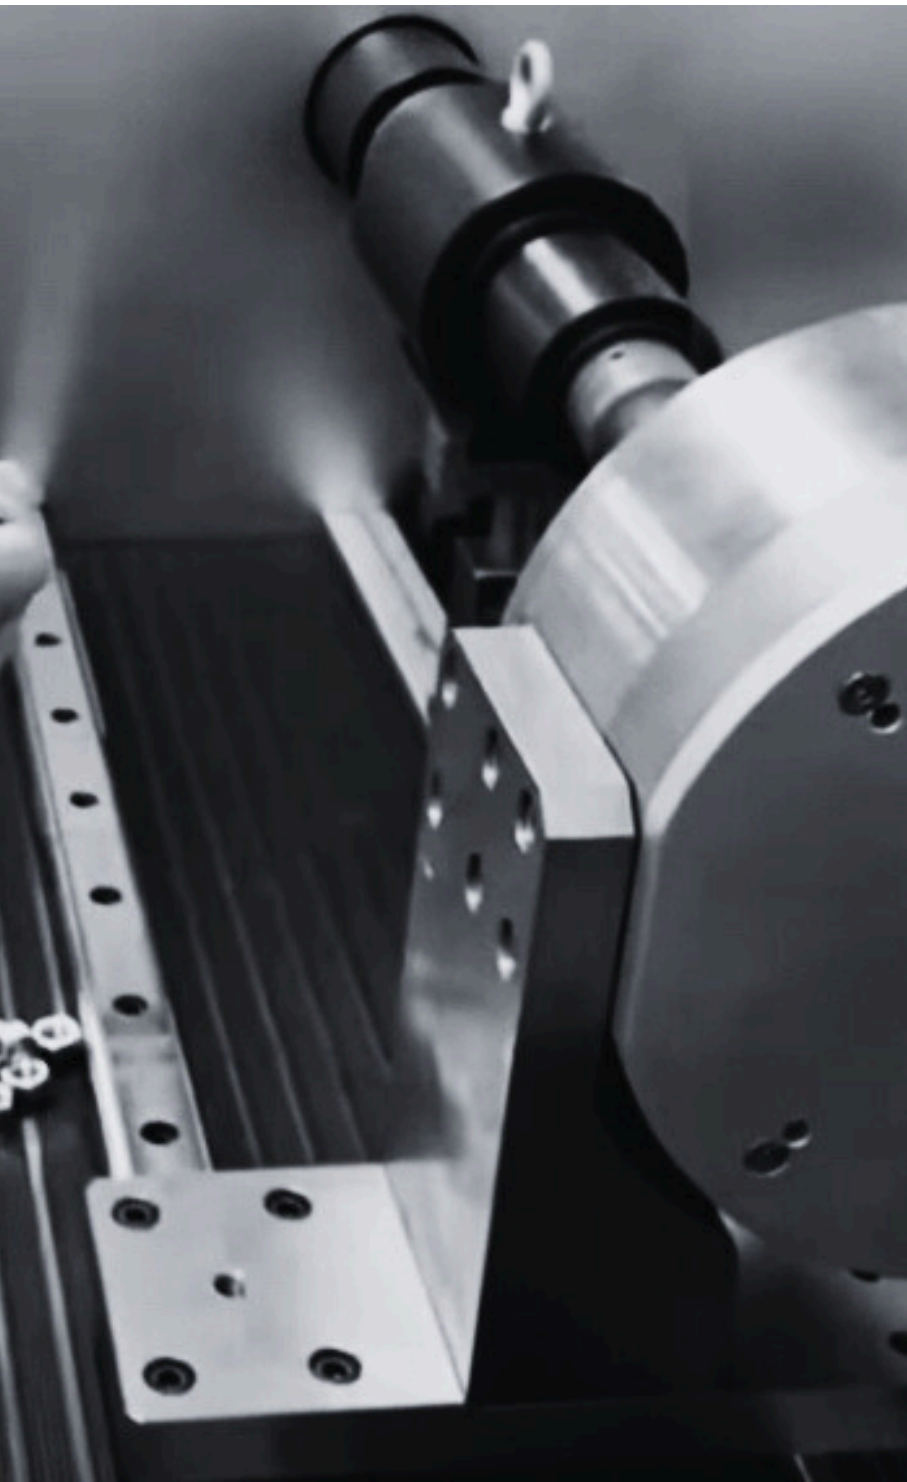

10 KN - 200 KN

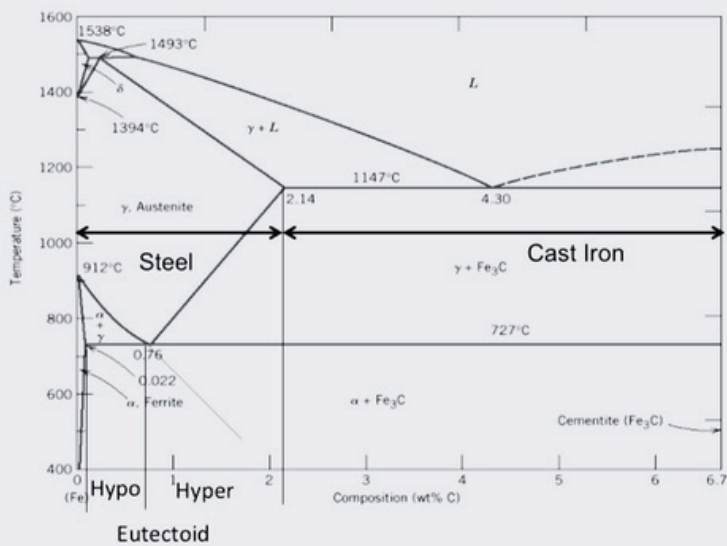

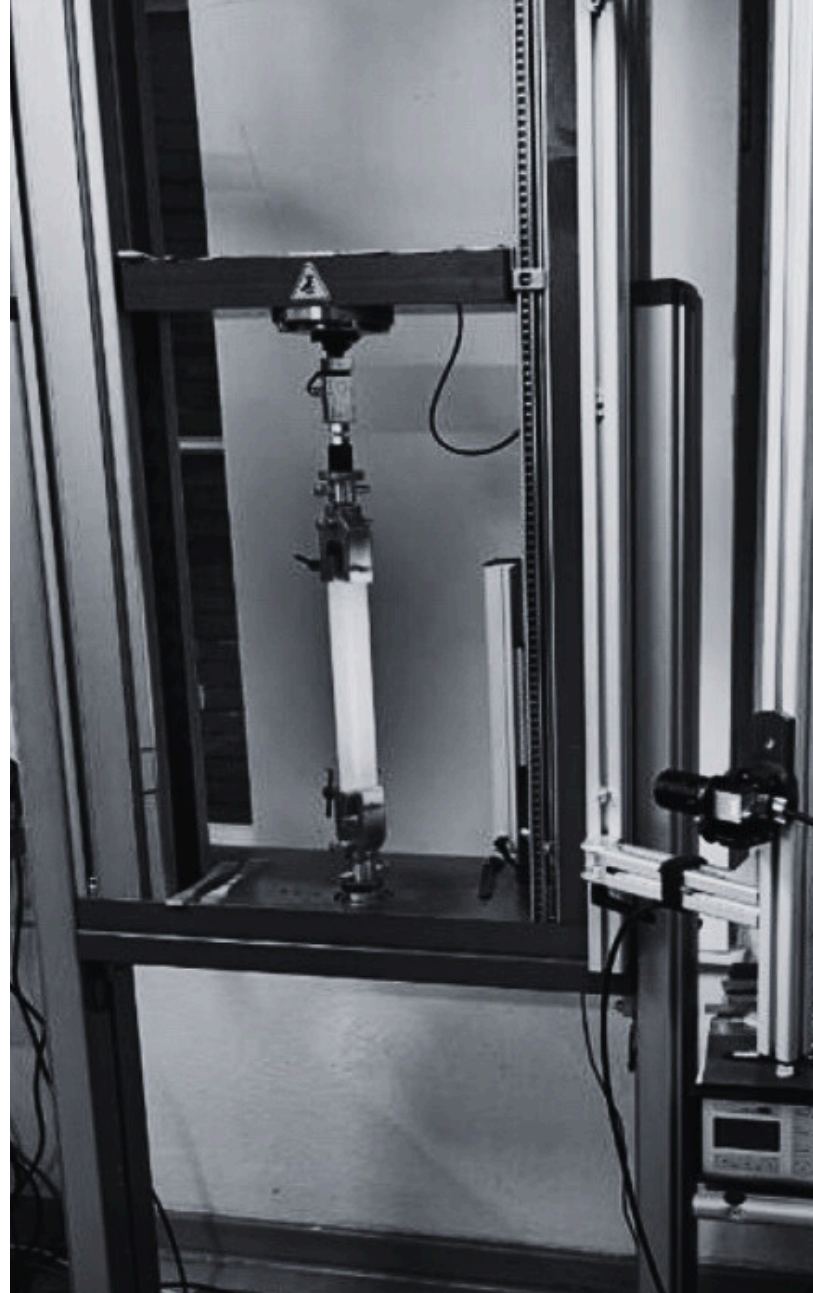

For Metals, Non Metals

# ISO 16047 Tools

The Tools for Bolt Testing as per ISO 16047 viz COF of Bolt / Nuts or any rotating parts are manufactured in Highly efficient CNC . The Torque testing sensors , tools are well distributed and manufactured respectively.

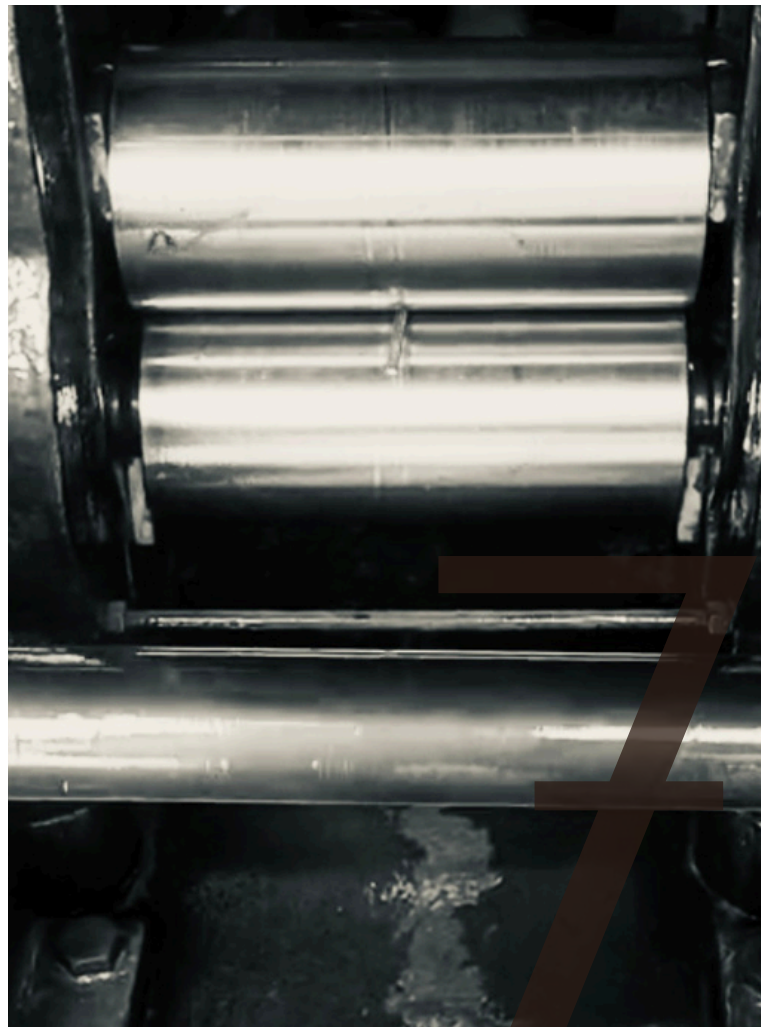

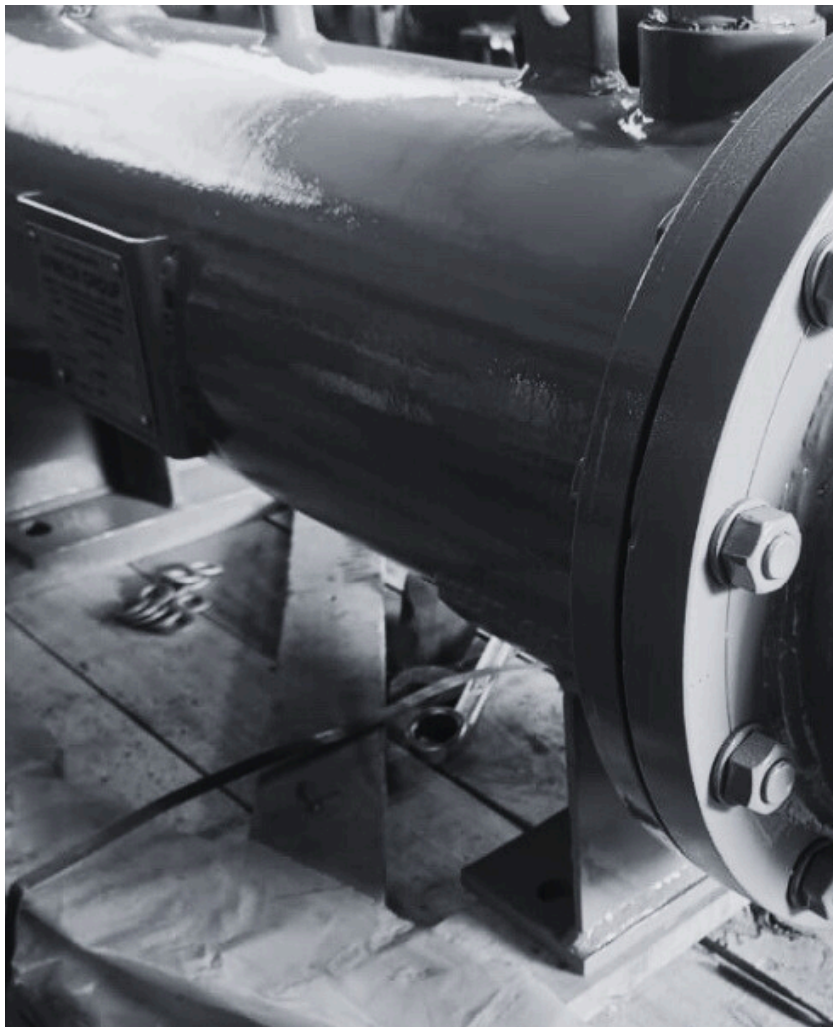

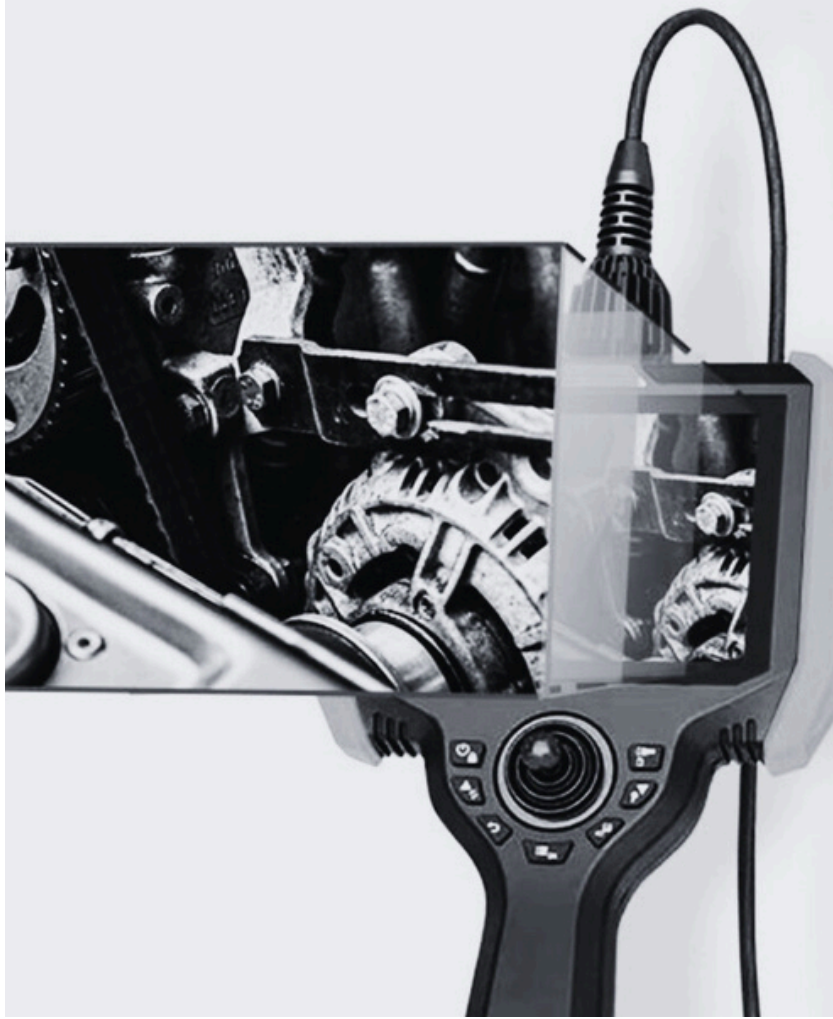

## Strain Measurement as per IS / ISO

The strain measurement is a critical parameter. Our own mechanical clip on device and Limess Messtechnik GmbH Non contact device is our perfect solution since last few years. The samples can be well marked and the change in gauge length are observed in either version. The high temperature version is available.

Thank you!
